OSA - 5376-63

CY 3 OF 3
10 OCT 1963

MEMORANDUM FOR: Assistant Director, Office of Special Activities

FROM: Assistant Director, Office of Scientific Intelligence

SUBJECT: Request for OSI Use of DD/S&T/OSA Communications Facilities

1. The need has arisen for establishing a telecommunications link between CIA/OSI and one of its external contractors, [REDACTED]

[REDACTED] over which can be relayed material classified at the T and KH security level. As DD/S&T/OSA contains the only communications facility in CIA Headquarters building that is authorized to relay such material, permission is requested for OSI to use this facility for the above stated purpose as soon as possible.

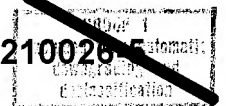

2. The anticipated total volume of traffic between OSI and [REDACTED] should not exceed three to five messages per week. The individual messages will be relatively short (one or two paragraphs) since other channels exist for exchange of messages which are more lengthy or are of a routine nature. No non-T/KH material will be relayed via the OSA communications center by OSI or [REDACTED]

3. If this request is approved, OSA may wish to authorize training of the cryptographic operators at [REDACTED] on internal formats and procedures used by the OSA communications network. Two operators at [REDACTED] will be available for such training.

4. The OSI point of contact for operational details related to this request is [REDACTED] in OSI/DSD. He is located
